

## NEWS RELEASE

### **Aeturnum, Inc. Recognized by Microsoft with FAST Innovative Solution Award at SharePoint 2009 Conference**

*Services and Solution Provider One of Just Six Recipients of Inaugural SharePoint Partner Awards*

**Westford, MA, October 22, 2009** - [Aeturnum, Inc.](#), a provider of enterprise software development services and solutions, today announced that it has received the FAST Innovative Solution Award at the SharePoint 2009 conference taking place this week in Las Vegas. The award recognizes Aeturnum's Search Solutions Framework as an outstanding partner solution built on FAST search technology that demonstrates high-end search capabilities and offers a compelling user experience. The Search Solutions Framework is an integrated business information platform that enables Microsoft customers to easily customize and extend the capabilities of FAST and SharePoint to fully expose their rich functionality and deliver maximum user benefit and ROI.

The award is part of the inaugural [SharePoint Conference Partner Awards](#) recognizing a select group of partners for their ability to drive innovation and help customers save money and increase efficiency by realizing the benefits of SharePoint as an integrated server platform and the best-in-class enterprise search solutions enabled by FAST technology. Aeturnum was one of just six partners to be recognized with an award.

[\(View a video of the awards at the SharePoint Conference\)](#)

Aeturnum provides enterprise application development services and solutions including business intelligence, data warehousing and search. The company partners with Microsoft to provide best-in-class [information access and portal solutions](#) for its customers and has strong expertise with both Microsoft FAST and SharePoint technologies. These portals are built on [Aeturnum's Search Solutions Framework](#), which integrates pre-developed technology components with FAST ESP and Microsoft technologies to enable fast, easy access to the right information inside, across and outside the enterprise. The Framework leverages FAST to enhance SharePoint's content search capabilities and extend its access to a variety of data sources across the enterprise including back end systems such as product catalogs, inventory, billing and merchandising as well as the Internet, e-mail databases, audio and video files, document images and other internal and external repositories. It also enables FAST to unify and personalize all these search results based on the user, and display them via the SharePoint UI.

"Enterprise users generally purchase a new technology with a clear idea of its potential benefits; however, they are not always able to fully translate the technology's capabilities into the desired outcomes for their business users," said Rajat Bhakhri, president and CEO of Aeturnum. "Aeturnum's Search Solutions Framework enables organizations to easily

customize and extend FAST and SharePoint to gain maximum benefit as quickly and efficiently as possible. We're very proud to be recognized by Microsoft and look forward to continuing to develop these solutions to enhance the tremendous benefits users gain from FAST and SharePoint."
